

New trends in TDI data in Slovenia

TDI annual expert meeting, EMCDDA, Lisbon
September 2012

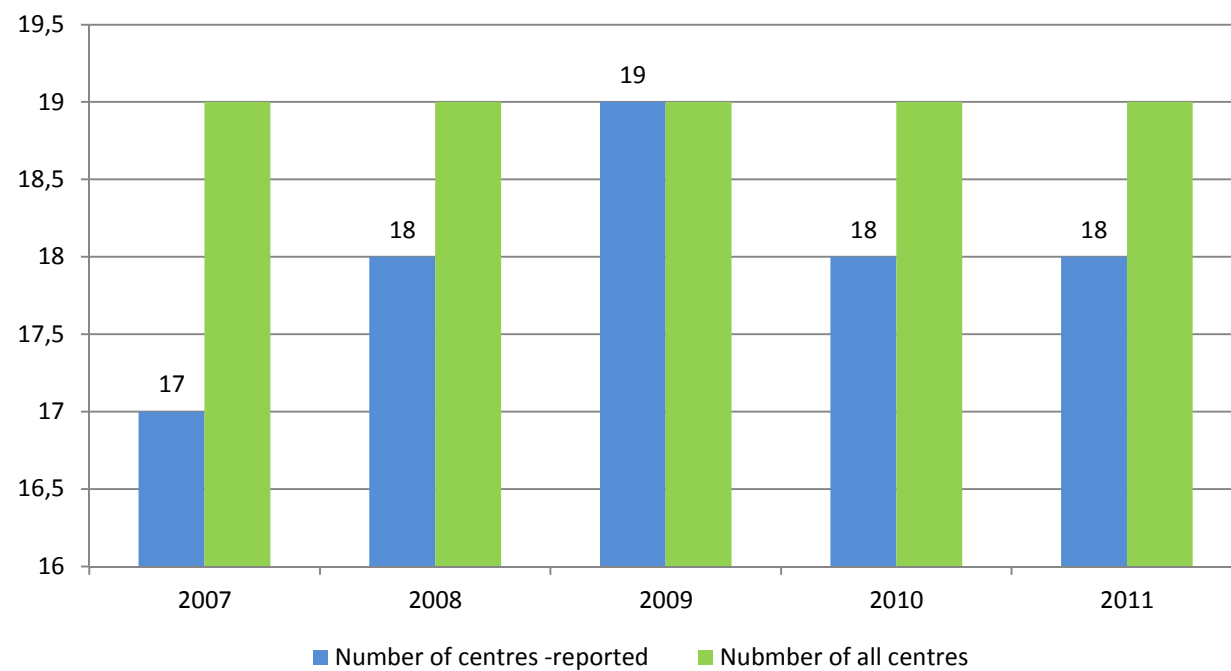

Romana Štokelj and Andreja Drev
(National Institute of Public Health)

REPORTING UNITS

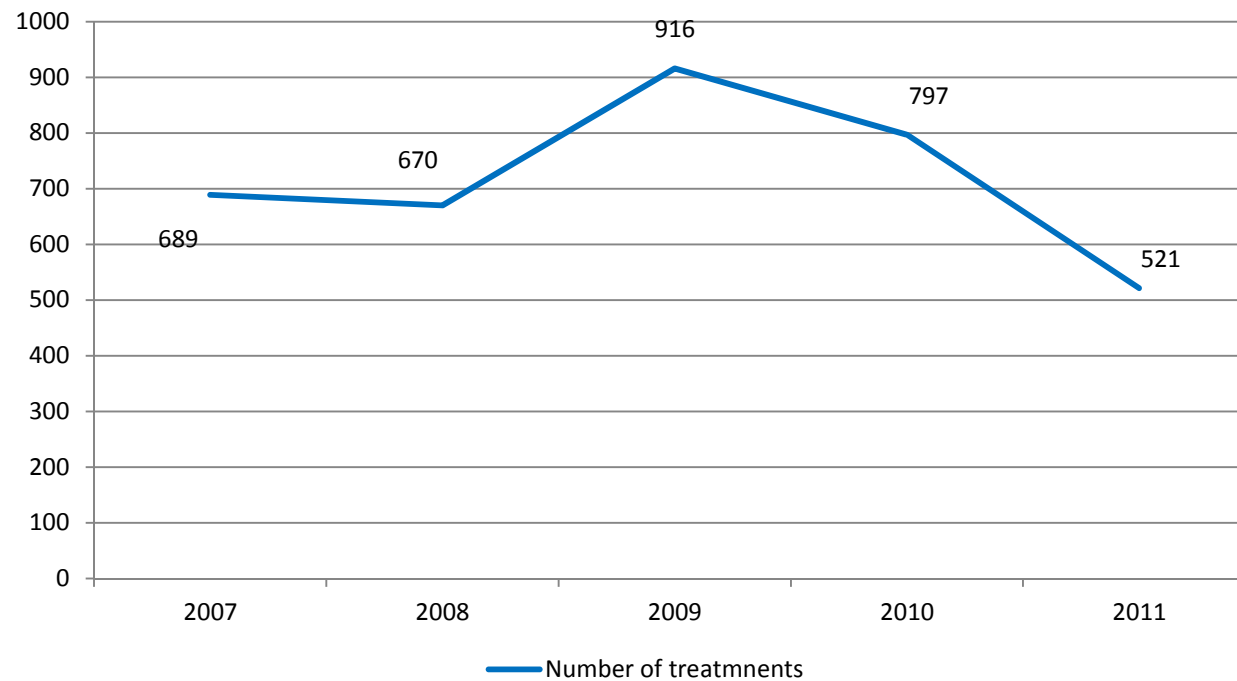

- 18 Centres for prevention and treatment of illicit drug addiction (Outpatient centers)
- 1 Centre for treatment of Drug Addicts at the Psychiatric Clinic of Ljubljana (Inpatient centre)

All reporting units are obligate by law to report data of all drug users who started treatment.

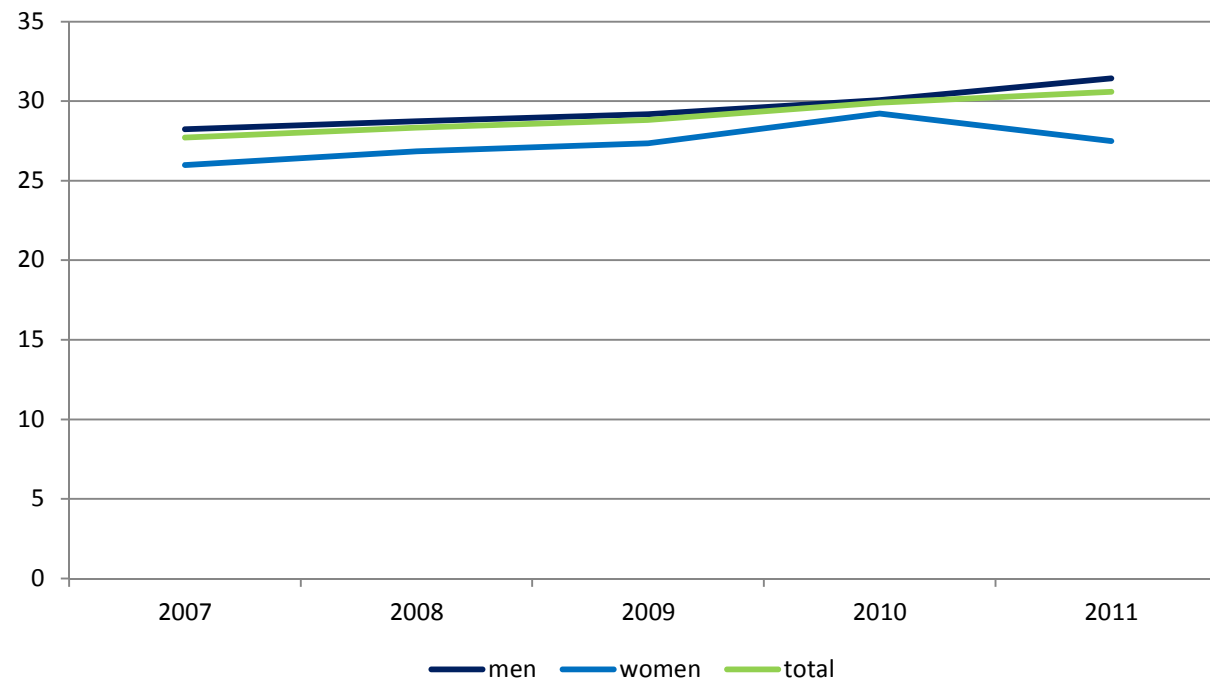

NUMBER OF CENTRES WHICH REPORTED DATA TRENDS 2007 - 2011

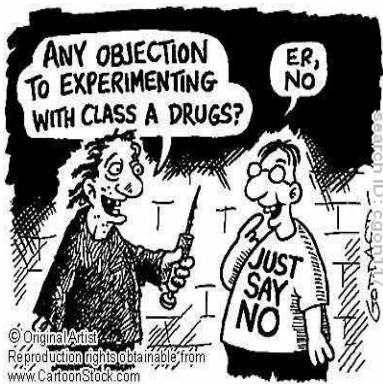

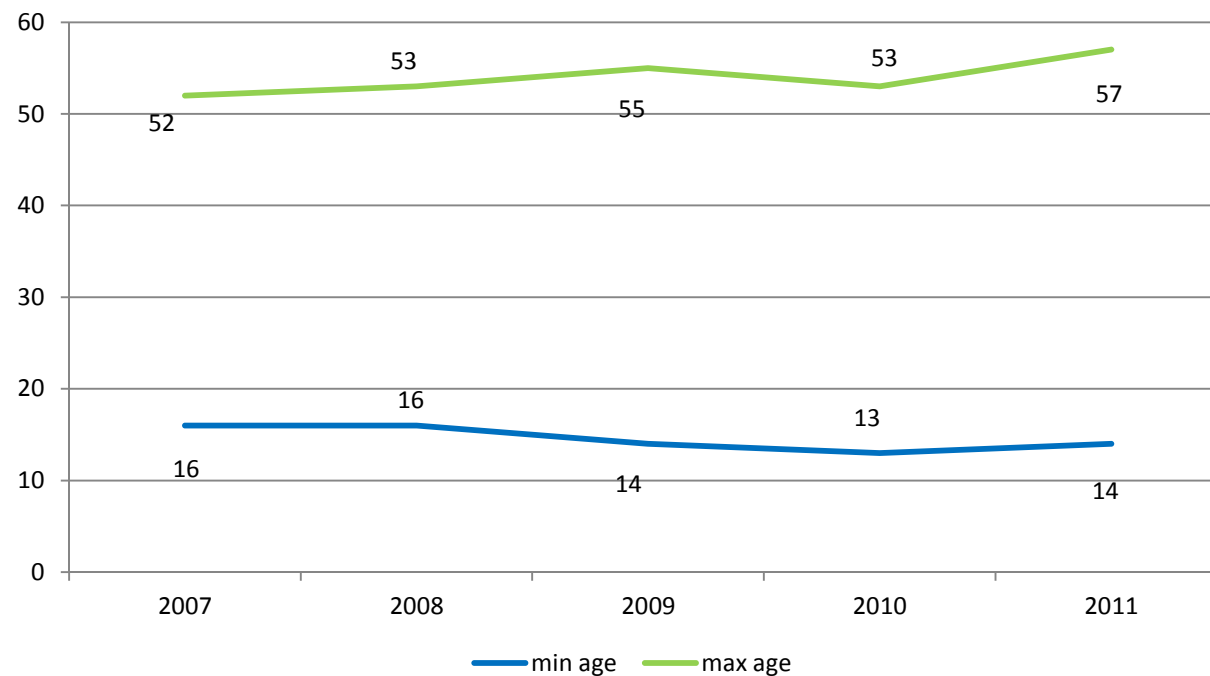

NUMBER OF ALL TREATMENTS TRENDS 2007 - 2011

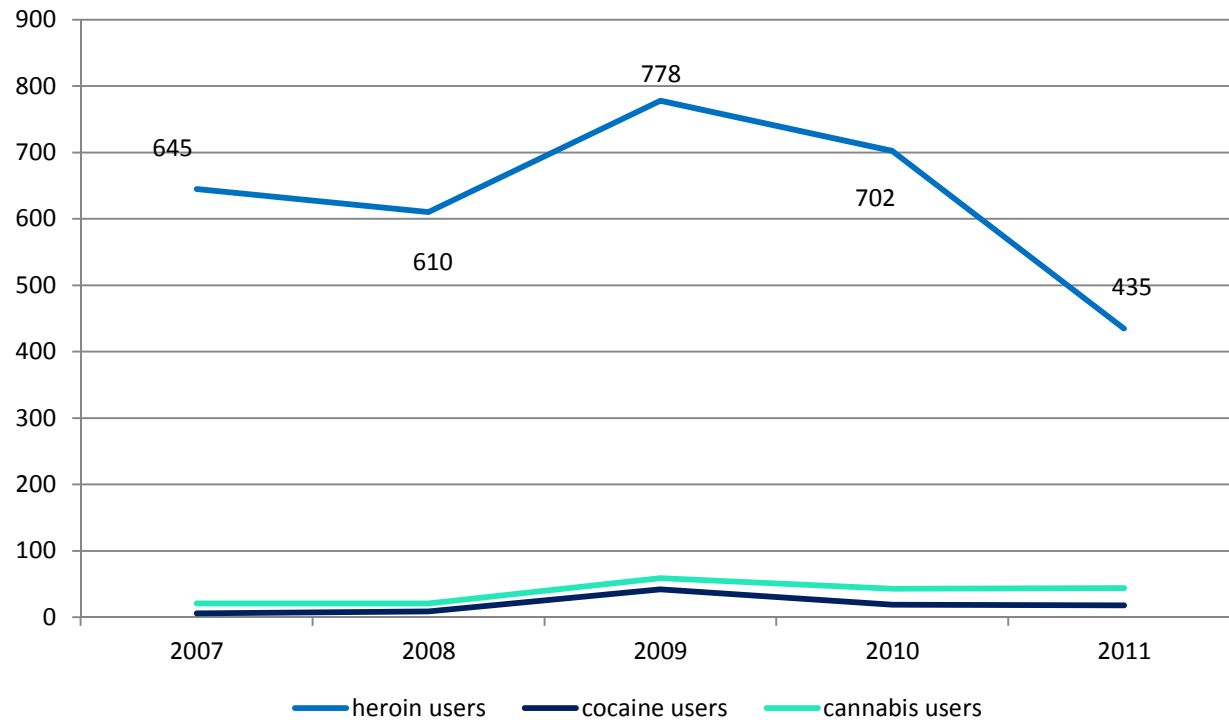

AVERAGE AGE OF DRUG USERS BY GENDER TRENDS 2007 - 2011

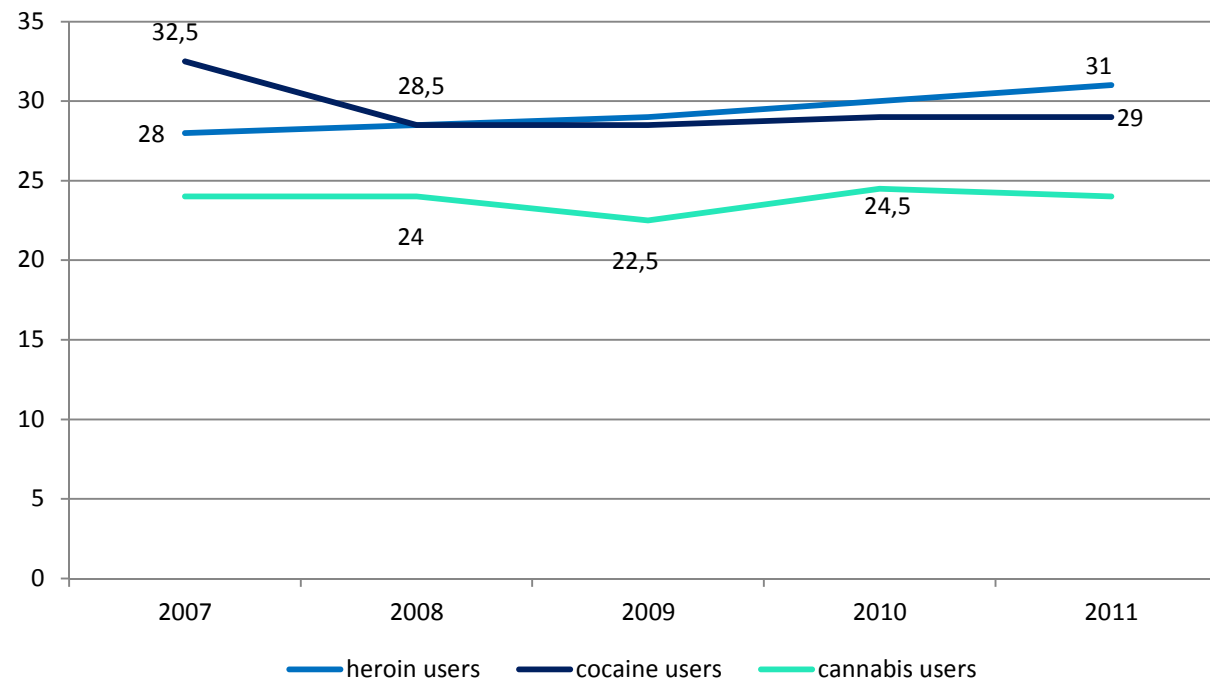

THE HIGHEST AND THE LOWEST AGE OF DRUG USERS (TRENDS 2007 – 2011)

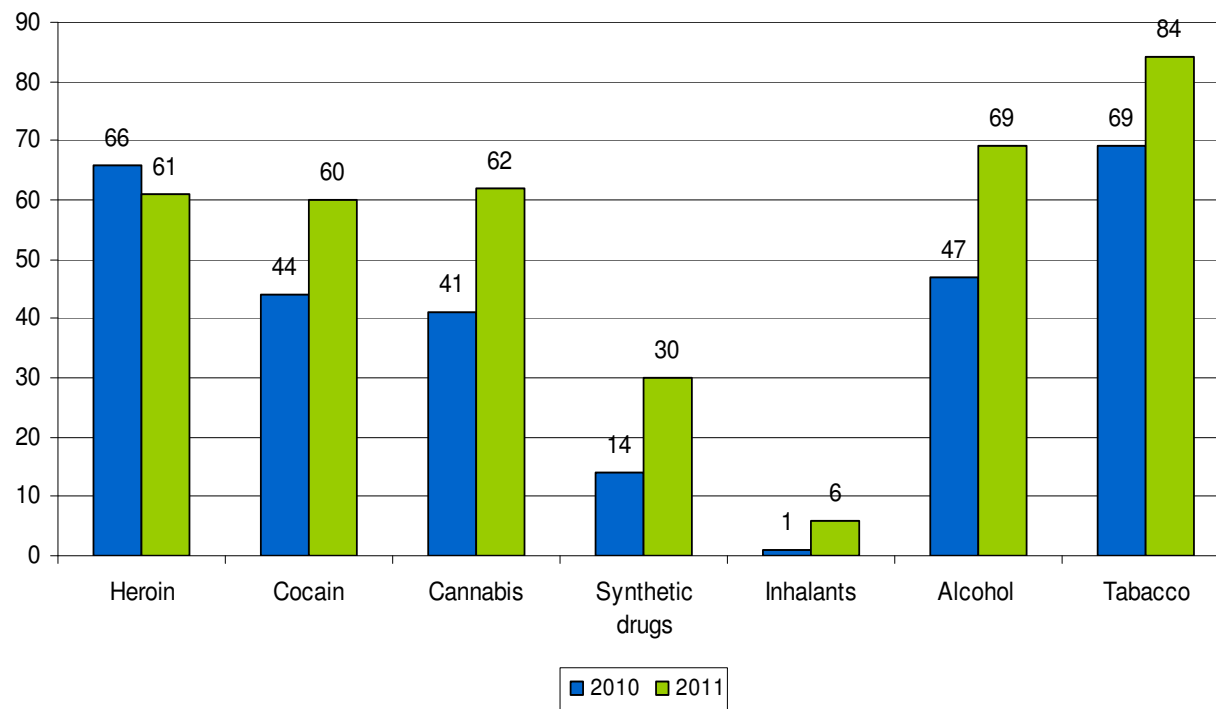

NUMBER OF HEROIN, COCAINE AND CANNABIS USERS (TRENDS 2007 – 2011)

AVERAGE AGE OF HEROIN, COCAINE AND CANNABIS USERS (TRENDS 2007 – 2011)

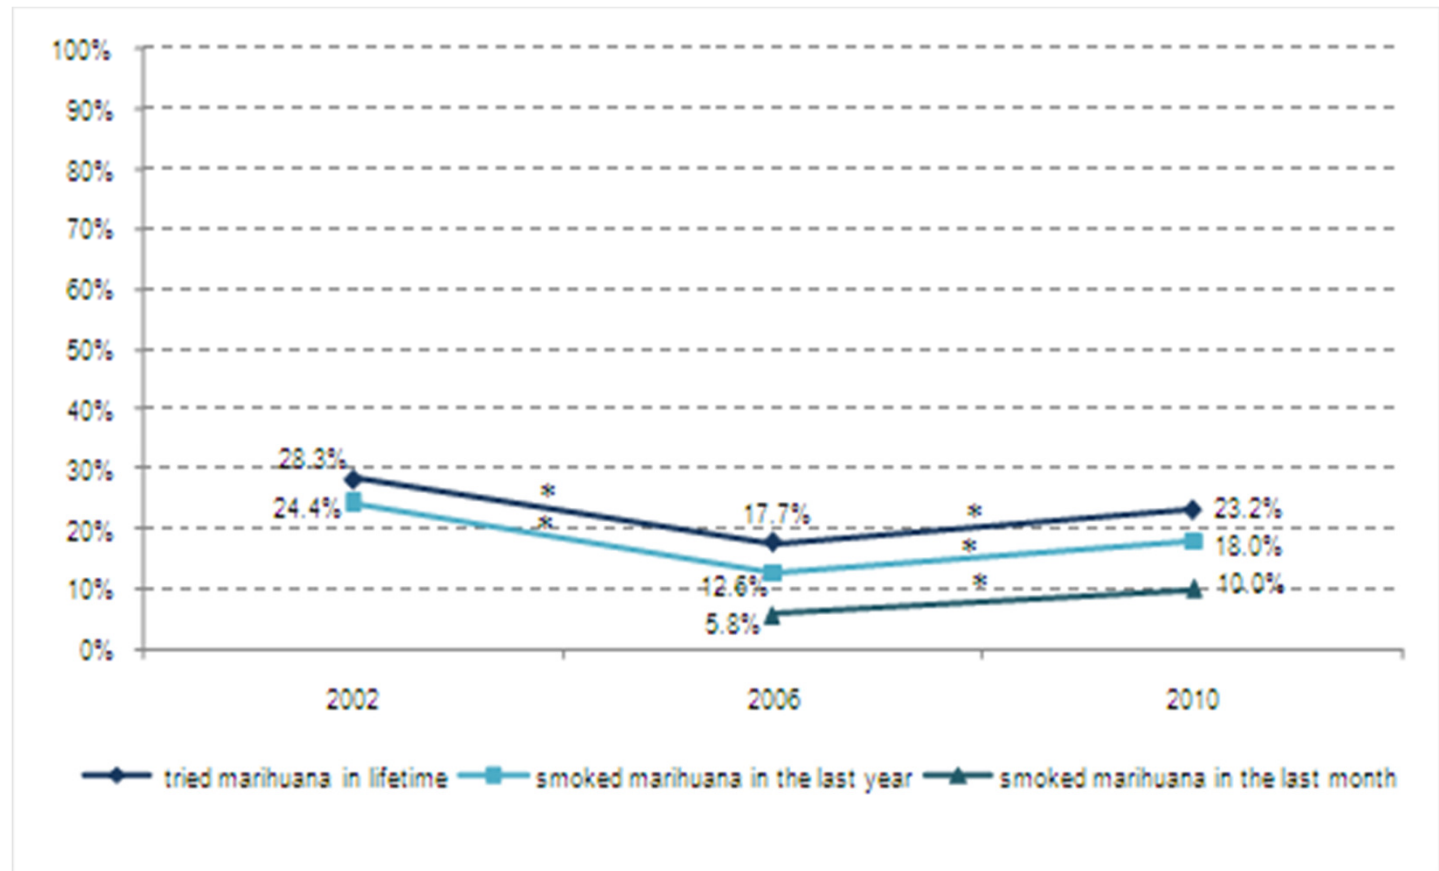

PERCENTAGE OF INTERVIEWEES BY DRUG USE IN LOW-THRESHOLD PROGRAMS, 2010 – 2011

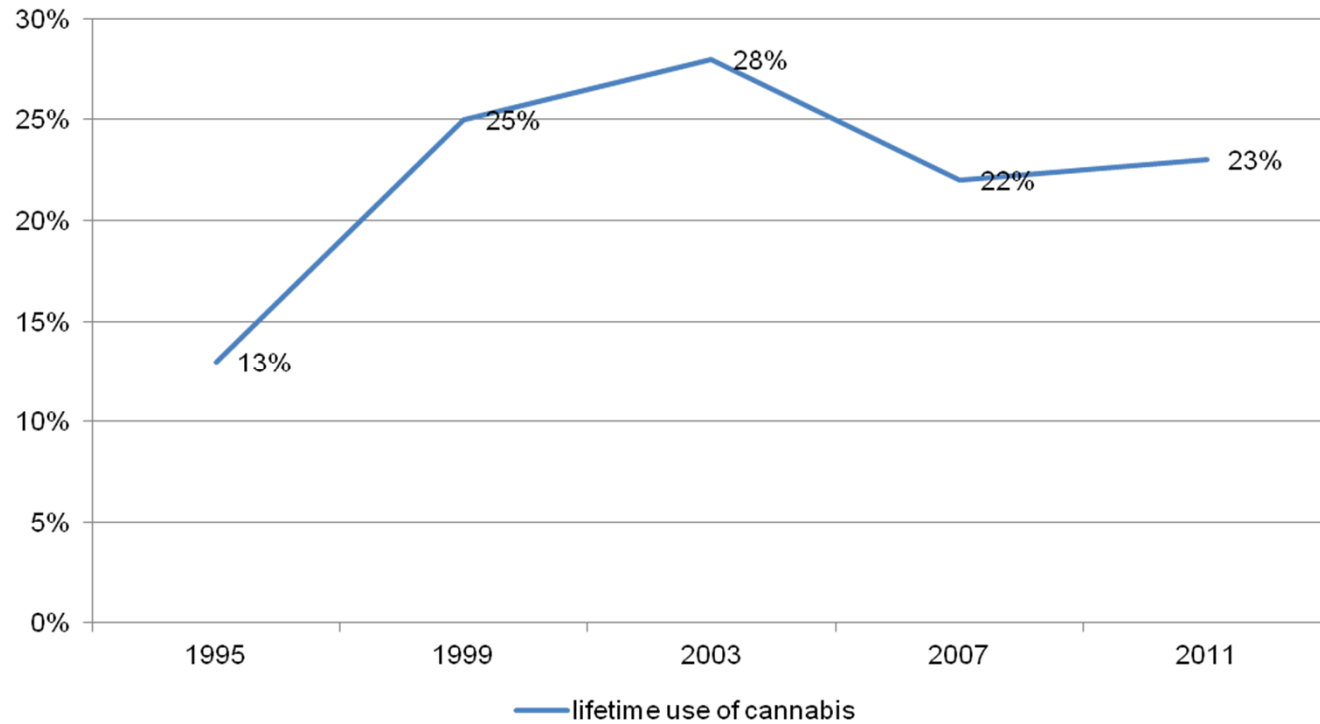

Source: Ines Kvaternik and Živa Žerjal: Problem drug use among users in low - threshold programs, NP 2012
(Yet to be published)

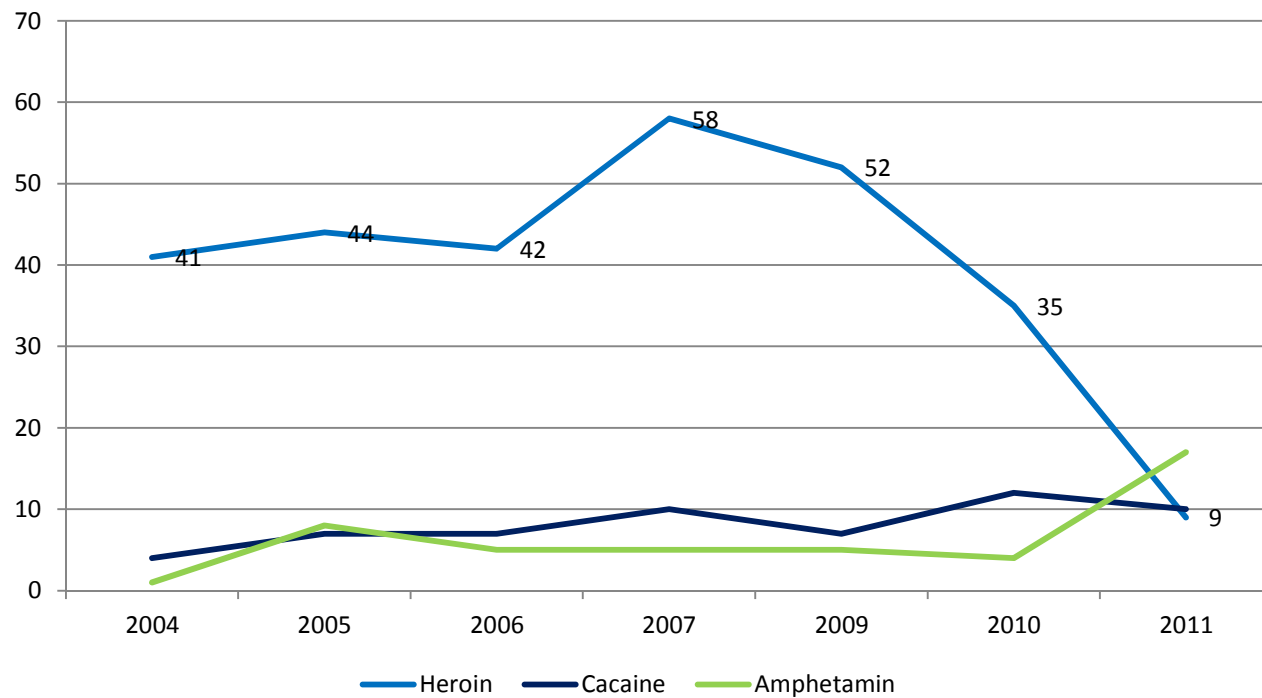

TRENDS IN CANNABIS USE IN 15-YEAR-OLDS (2002-2010) HBSC DATA

TREND IN CANNABIS USE IN 15-16 YEAR-OLDS (1995-2011) ESPAD DATA

TRENDS NON-FATAL OVERDOSES AND DRUG RELATED EMERGENCIES

Source: Brvar: Non-fatal overdoses and drug related emergencies, NP 2012
Yet to be published.

CONCLUSION

- It is sensible to do evaluation how suitable are treatment programs for cocaine, cannabis and synthetics drugs users in Treatment centres.
- On National Institute of Public Health in 2011/2012 was conduct GPS and it will be very interesting to see what is the prevalence of heroin, cocaine, cannabis, synthetics drugs and polydrug use.

Thank you very much for your attention.
