Program:

- **1. About RECAP:** French TDI monitoring system
 - How, when, and why was it created?
 - Treatment centres
 - Key numbers
 - France-specific questions
- **2. Groups of patients**
 - Definition of groups
 - Characteristics of patients by group
 - Differences between groups
 - gender, mean age, products, source of referral,...
- **3. Conclusions**
 - Utility of classification by groups

1. About RECAP: *TDI* - *RECAP*

TDI

RECAP survey
(Commun Data
Collection on Treatment
and Drug Addiction)

1. About RECAP: *What is RECAP survey?*

Aim: to identify the key socio-economic **characteristics** and use habits of drug users and to follow the **evolutions**

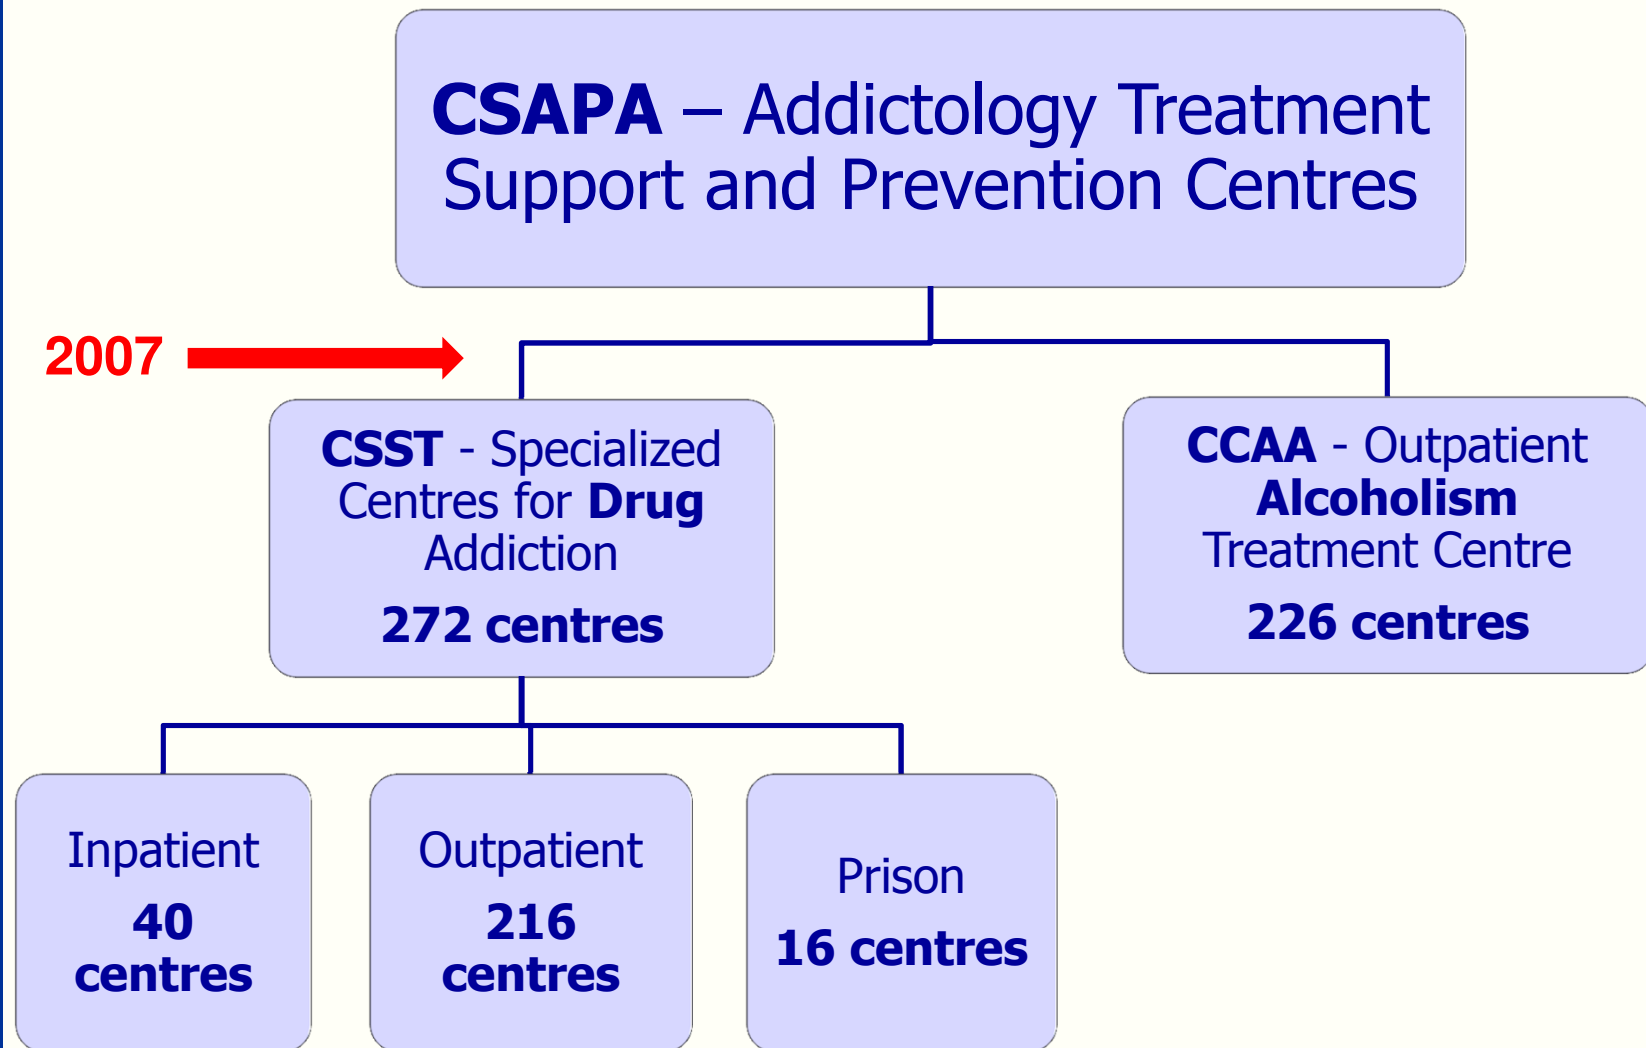

Public: all **patients treated** in the Specialised drug addiction treatment centres throughout the whole year

For: policy makers, health and social professionals, EMCDDA, general public

1. About RECAP: *Treatment centres in France*

1. About RECAP: *Timeline*

**January -
February**

- FMCDDA requests TDI data from the centres

**March -
April**

- Centres send TDI data in txt format by email

May - Jun

- creation of unique TDI database at national level

July

- transmission of personalized results to each structure

September

- transmission of national TDI data to the EMCDDA

1. About RECAP: *Key numbers*

2005

- **44 620** patients registered (drug treatment centres)
- **135** drug treatment centres
- **92** alcohol treatment centres
- Reply rate **60%**

2011

- **96 046** patients registered (drug treatment centres)
- **195** drug treatment centres
- **107** alcohol treatment centres (in 2009)
- Reply rate **70%**

1. About RECAP: *Questions*

93 questions divided in 8 groups:

1. Centre / Personal identifications

2. Socio - demographic information

3. Source of referral

4. Drug related information

5. Substitution treatments / other treatments

6. HIV / HCV serology , HVB vaccine

7. Hospitalisation and suicide (*frequency*)

8. Imprisonment (*when, length and number*)

2. Groups of patients: *Definition*

Classification in groups is based on primary drug and OST

Cannabis

- Users with cannabis problem
- Not under OST
- Mean age 26 years

Opioids, cocaine and other products

- Mostly problem with opioids and/or cocaine
- Under OST
- Often poly-consumers
- Mean age 36 years

Alcool

- Received in alcohol treatment centres
- Mean age 42 years

2. Characteristics of groups : *Socio demographic profile*

Cannabis

- Living with the family (49%)
- Without children (81%)
- Stable accommodation (85%)
- Students (23%)
- Never previously treated (77%)

Opioids, cocaine and other products

- Living alone (36%)
- With children (44%)
- Less often in stable accommodation (74%)
- Receiving social benefits (44% vs 23% in group cannabis)
- Previously treated (68%)

Alcohol

- Living alone (37%)
- With children (56%)
- Stable accommodation (88%)
- Regularly employed (42%)
- Previously treated (68%)

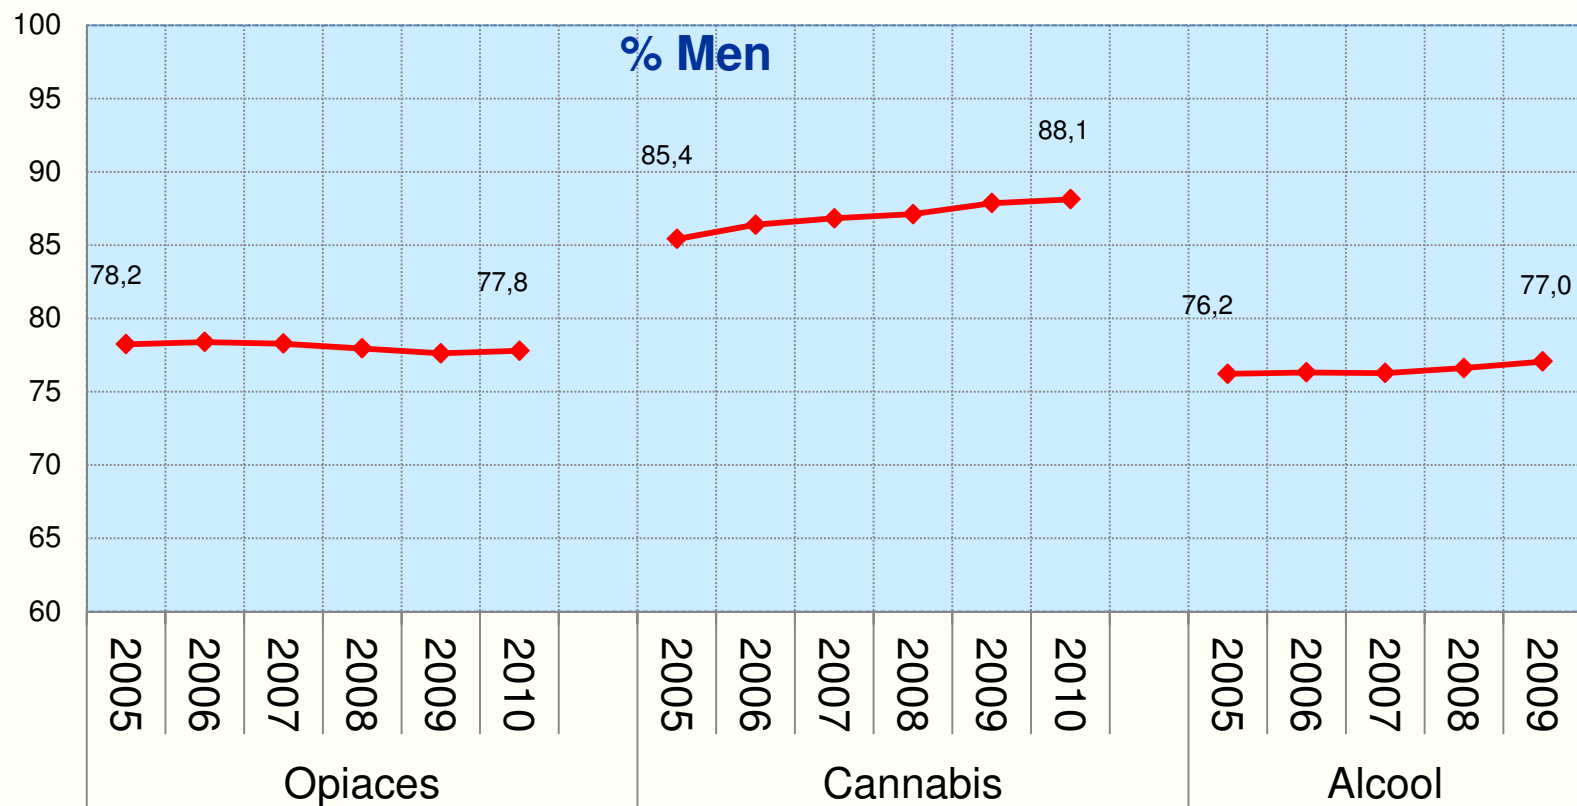

2. Differences between groups : *Evolution of groups*

- Part of **cannabis** users decreased since 2005:

2. Differences between groups : *Gender*

- Increase in the % of men for **cannabis** group:

2. Differences between groups : *Mean age*

- Increase of the mean age for the **cannabis** and for the **opioids, cocaine and other products** groupe:

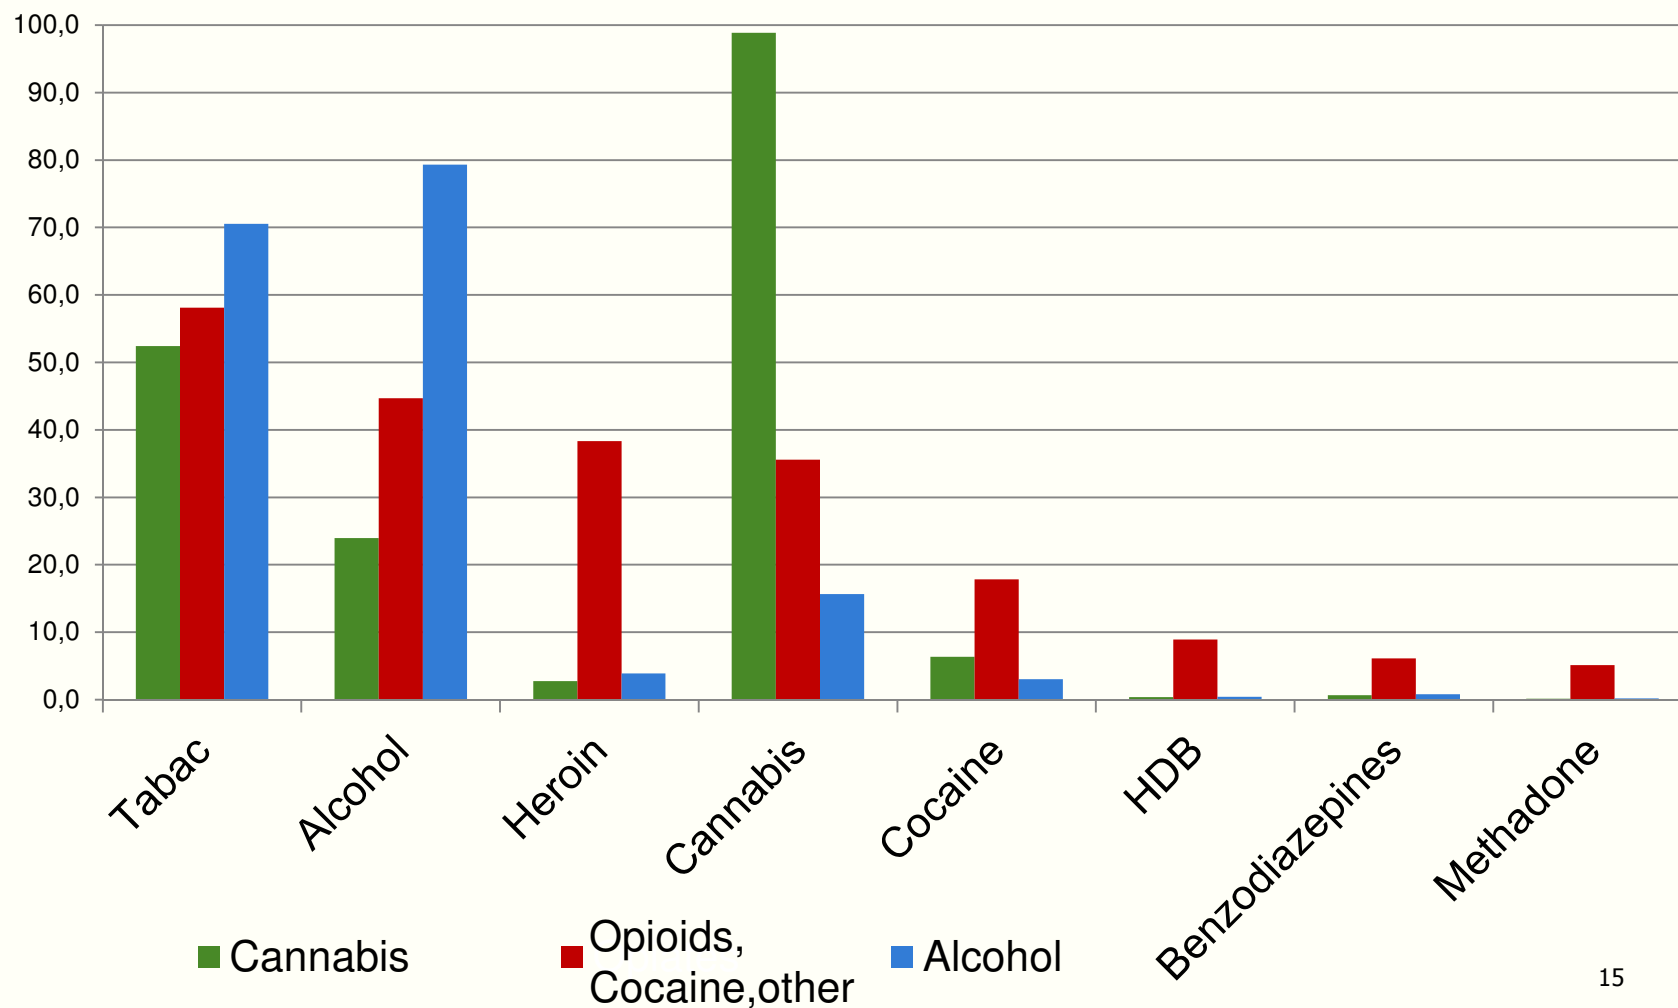

2. Differences between groups : *Source of referral*

■ Very different source of referral by group:

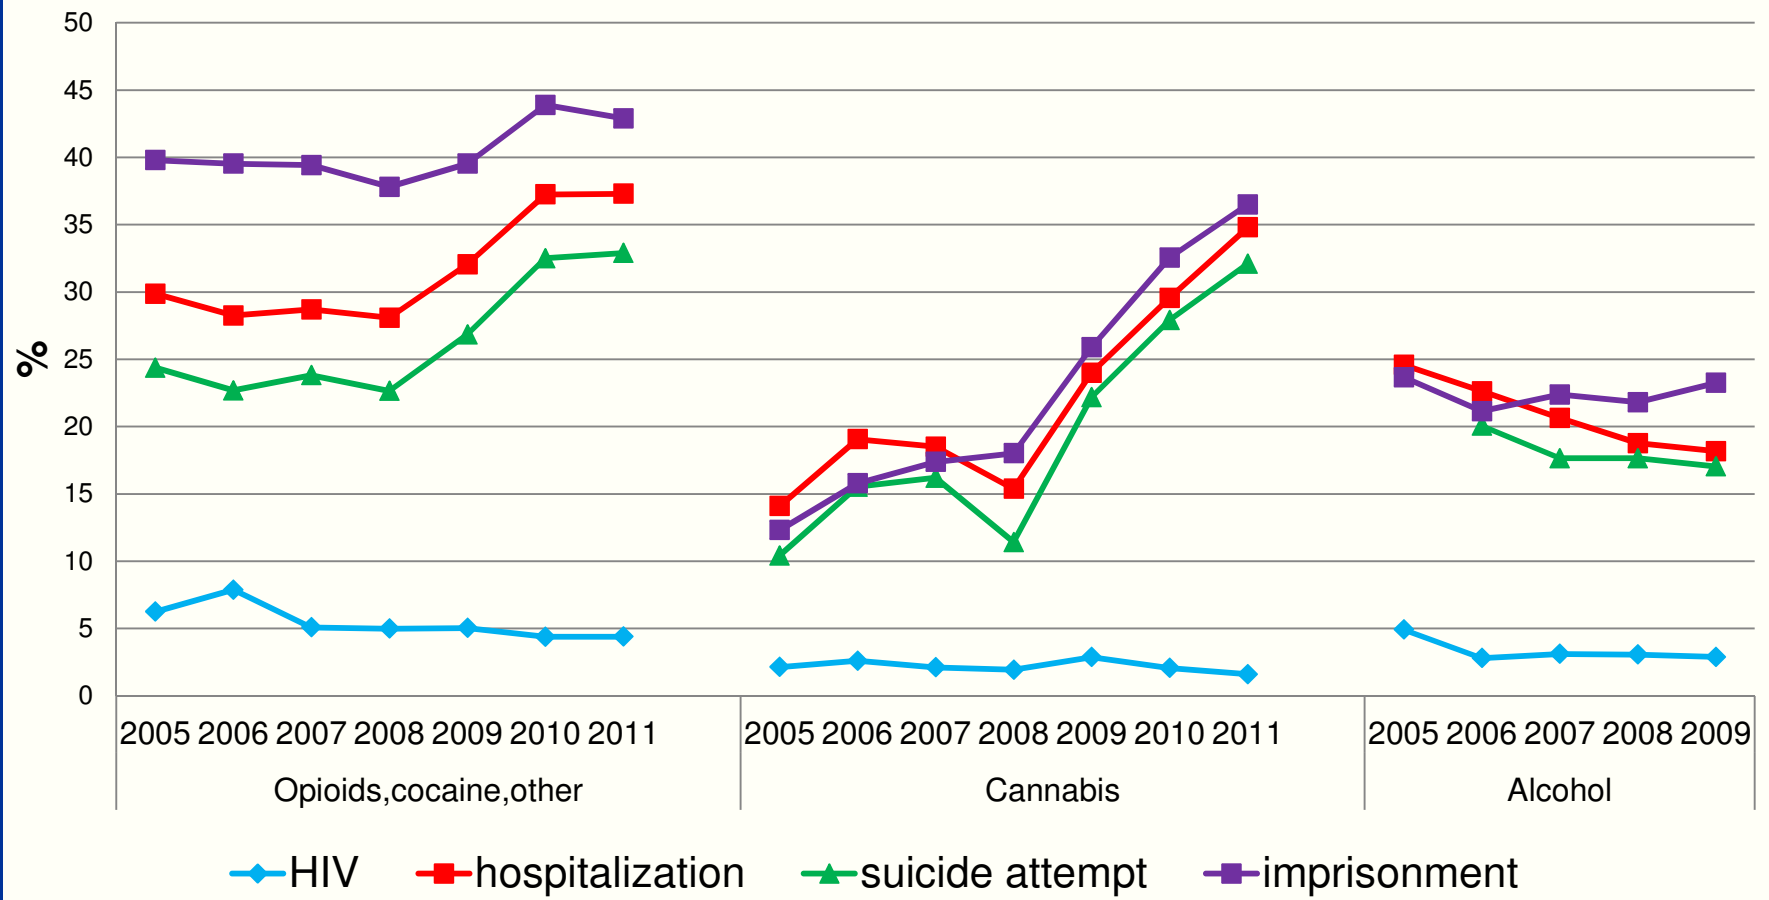

2. Differences between groups : *Products used*

- Poly consommation in **opioïds, cocaine and other products** group:

2. Differences between groups : *Other Characteristics*

- Different slope for each group:

2. Differences between groups : *Example : imprisonment*

- Underestimating the problem of rapid increase of imprisonment among **cannabis** users:

3. Conclusion:

Why to use group classification?

- With simple distinction of only 2 (3) groups it is possible to obtain:
 - homogeneous population with similar:
 - socio-demographic profile
 - use habits
 - products consumed ...
 - coherent et comparable results
 - minimize overestimating or underestimating of some observed results (*example: imprisonment*)

Merci de votre attention!
