from the EU drugs agency in Lisbon

UPCOMING ISCTE-IUL–EMCDDA SUMMER SCHOOL: 26 JUNE–7 JULY 2017

Registration opens for sixth European drugs summer school

(17.10.2016, LISBON) The **University Institute of Lisbon (ISCTE-IUL)** and the **EU drugs agency (EMCDDA)** will be joining forces next summer to hold the sixth European drugs summer school (EDSS) on ‘Illicit drugs in Europe: demand, supply and public policies’ ⁽¹⁾. Registration opens today for the two-week course, which will take place in the Portuguese capital from 26 June to 7 July ⁽²⁾. The initiative is also supported by the **US National Institute on Drug Abuse (NIDA)** ⁽³⁾.

Through a multidisciplinary and interactive approach to the drugs problem, **EMCDDA** scientific experts, leading academics, guest speakers and policymakers, will prepare participants to meet the complex policy challenges in this field — both in Europe and beyond. The focus of the 2017 course will be on **preventing and reducing mortality**.

Week 1 of the summer school, focusing on the ‘**Drugs problem: market, substances, use and harms**’, will feature lectures on: the global burden of drug-related problems; drug markets in Europe; detecting new drugs; and demand-reduction interventions. This session will also focus on the **EMCDDA**’s epidemiological indicators and their use in informing drug policy.

Week 2, dedicated to ‘**Policymaking for drug-related issues**’, will include lectures on: drug policies (concepts, issues and analysis); the EU drug strategy; drug laws and public expenditure; and monitoring supply reduction and drug enforcement activity. It will close with an analysis of the link between evidence and decision-making.

Study visits to outreach facilities and to one of the Portuguese commissions for dissuasion will be organised over the two weeks. During the course, students will also participate in interactive workshops to discuss their own projects and views. The course will conclude with an open debate with guest speakers.

The target audiences for the EDSS are: university students, researchers, professionals and administrators interested in working on drug issues. The previous rounds of the summer school brought together students from the EU Member States as well as from Africa, Asia, Australia and the Americas.

Profiles of former alumni and their testimonials can be found on the official summer school website and their statements viewed in a promotional video. In 2017, students will again be able to apply for scholarships and ‘early-bird’ reductions are available ⁽⁴⁾. The EDSS is run in English.

Notes
